Excerpt of a dynamically re-ranked checklist injected into the audit prompt

1. Arbitrary delete (score: 0.9255)
Description: unrestricted DeleteApplication allows contract destruction.
Precondition: stateful application handling DeleteApplication.
Security check: restrict DeleteApplication to creator/admin.

2. Arbitrary update (score: 0.9101)
Description: unrestricted UpdateApplication allows logic replacement.
Precondition: handling of OnComplete.UpdateApplication.
Security check: verify Txn.sender() == Global.creator_address().

3. Unchecked Asset Receiver (score: 0.9079)
[... full detail for top-N matches ...]

4–8. [remaining classes, condensed]
Audit instructions: use the list above as a priority guide. Analyze the code step by step inside <think>, checking each precondition in order.
